

Aliah University

End-Semester Examination (Spring Semester) - 2020

(For 1st Year 2nd Semester B.Tech (CSE))

Paper Name: Introduction to Computer Programming

Full Marks: 40

Paper Code: CSE102 (CSE)

Time: 2 hrs

Group-A

(Answer any eight questions)

8 × 5 = 40

Note: Do not attempt any extra question otherwise the total marks will be reduced.

1. Describe arguments in a function. What are macros? Explain with examples. 2+2+1
2. What are the primitives in C language? What is the relationship between array name and pointer? 5
3. Define and take inputs from keyboard for a 3-dimensional array in C programming. 5
4. Define a student structure which has “Name”, “Age” and “marks in two subjects” attributes. Take inputs from keyboard for these attributes and display them on the screen. 5
5. Explain the basic string standard functions with proper examples and discuss their usability. 5
6. Write a C program to add “Mr.” or “Miss.” before the name of a person after checking whether the given name of the person is either male or female. 5
7. Write a C program for passing two arrays to a function and display their sum using same function. 5
8. Write a C program to enter 5 elements in an array and find the **third** smallest number from the same array. 5
9. Write a C program to find (i) element-wise multiplication and (ii) transpose of two matrices which have 3-rows and 3-columns, the inputs must be taken from keyboards. 5
10. Write a program in C to read an existing file "abc.txt". 5
