

Unit: 1

A. Invention of the printing press and growth:

Introduction:

The invention of the printing press is one of the most important developments in the history of human civilization. It changed how information and knowledge were shared, leading to a revolution in education, literature, religion, science, and communication. The printing press allowed for the mass production of books, which helped shape the modern world.

1. Early Writing and Communication (Before Printing Press):

- Before the printing press, people used **handwritten manuscripts**, which were copied by **scribes**.
 - These manuscripts were written on **parchment or palm leaves** and were **time-consuming and expensive**.
 - Very few people had access to books – mainly religious institutions and royal courts.
 - Common people were mostly **illiterate** due to a lack of reading materials.
-

2. Invention by Johannes Gutenberg:

- The printing press was invented around **1440** by **Johannes Gutenberg** in **Mainz, Germany**.
 - Gutenberg's most important contribution was the **movable type printing system** made from **metal alloys**.
 - He used **oil-based ink** and a **wooden screw press** (similar to a wine press) to print multiple copies.
 - His most famous work was the **Gutenberg Bible**, printed in **1455**, in Latin.
 - It had 42 lines per page and is considered the first mass-produced printed book in Europe.
-

3. Spread and Growth of Printing in Europe:

- Gutenberg's invention spread quickly across Europe within 50 years.
 - By **1500**, over **20 million books** had been printed across **more than 200 cities** in Europe.
 - Cities like **Venice, Paris, London, and Rome** became important printing centers.
 - It supported the **Renaissance** (rebirth of art and knowledge), the **Reformation** (religious reform), and the **Scientific Revolution**.
-

4. Impact on Society and Culture:

- **Knowledge became cheaper and accessible**, which increased **literacy**.
 - It helped in the growth of **universities, public libraries, and education** systems.
 - Important works by **Shakespeare, Newton, Galileo, and Martin Luther** were widely published.
 - **Newspapers, journals, and magazines** started emerging in the 17th century.
 - People started **questioning authority**, and ideas of **freedom, democracy, and reform** spread fast.
-

5. Arrival and Growth of Printing in India:

- The printing press came to India with the **Portuguese missionaries**.
- In **1556**, the first printing press was set up in **Goa** by **Father Gaspar Caleza**, a Jesuit priest.
- The first Indian language printed was **Tamil**, followed by **Konkani and Marathi**.
- Later, printing expanded to **Bengal, Bombay, Madras, and Punjab**.
- By the 18th and 19th centuries, newspapers like **Hicky's Bengal Gazette (1780)** and **Samachar Darpan (1818)** played a big role in Indian society.
- The press helped in the **freedom movement** by spreading political awareness.

6. Modern Development of Printing:

- Printing technology improved over time:
 - **Rotary press** by Richard Hoe (1843) allowed high-speed printing.
 - **Offset printing** in the 20th century became popular for newspapers and books.
 - Today, **digital printing and e-books** are part of modern print culture.
-

Example:

If a scribe could write only one book in a year, a printing press could print hundreds of copies in that time. This meant thousands of people could now read the same book and learn new ideas.

Conclusion:

The invention of the printing press changed the world forever. It helped in the **spread of knowledge, literacy, reform, and social change**. Without this invention, the progress of **education, science, freedom of speech, and modern journalism** would have been impossible. It laid the foundation for **modern mass communication** and the **information age** we live in today.

B. Emergence of newspaper in India and growth of Indian language Press:

Introduction:

The newspaper is one of the oldest and most powerful tools of mass communication. It informs people about events, ideas, and government activities. In India, the newspaper played a major role in spreading education, awareness, and nationalism. The growth of newspapers in Indian languages helped reach the common people and played a big role in the freedom movement.

1. Beginning of Newspaper in India:

- The first newspaper in India was **Hicky's Bengal Gazette**, started in **1780** by **James Augustus Hicky** in **Calcutta (now Kolkata)**.
 - It was a **weekly English newspaper** and openly criticized the British government, which led to its ban in 1782.
 - After that, other English newspapers such as **Calcutta Gazette (1784)**, **Madras Courier (1785)**, and **Bombay Herald (1789)** were started by British settlers.
-

2. Growth of Indian-Run Newspapers:

- Indians began publishing newspapers in the early 19th century.
 - **Raja Ram Mohan Roy**, a social reformer, started **Sambad Kaumudi** in **Bengali** in **1821**, promoting social reform and education.
 - In the same year, **Mirat-ul-Akhbar**, a Persian-language weekly, was also started by Ram Mohan Roy.
 - These newspapers focused on social justice, women's rights, and freedom of speech.
-

3. Growth of Indian Language Press:

- As the freedom movement grew, newspapers in regional languages became very important.

- Some key newspapers and languages:
 - **Bengali:** *Samachar Darpan* (1818) by Baptist Missionary Society, *Tattvabodhini Patrika* (1843)
 - **Hindi:** *Udant Martand* (1826), first Hindi newspaper published in Calcutta
 - **Urdu:** *Jam-i-Jahan Numa* (1822)
 - **Tamil:** *Swadesamitran* by G. Subramania Iyer (1891)
 - **Marathi:** *Kesari* by Bal Gangadhar Tilak (1881)
 - **Gujarati:** *Gujarati* (1812), *Rast Goftar* by Dadabhai Naoroji (1854)
 - **Punjabi:** *Akhbar-i-Punjab*
 - These papers discussed social reforms, education, nationalism, and exposed British policies.
-

4. Role in Freedom Movement:

- Newspapers became the voice of Indian leaders like **Mahatma Gandhi**, **Bal Gangadhar Tilak**, and **Annie Besant**.
 - Gandhi edited **Young India**, **Harijan**, and **Navjeevan** to spread his message of non-violence and freedom.
 - Tilak's **Kesari** (Marathi) and **Mahratta** (English) spread nationalist ideas.
 - They helped unite people from different regions and created political awareness.
-

5. British Control and Press Acts:

- The British feared the power of the Indian press and introduced laws to suppress it:
 - **Vernacular Press Act (1878):** Introduced by Lord Lytton to control Indian-language newspapers.
 - **Press Act (1910):** Forced editors and printers to give security money.
 - Despite this, the Indian press continued to fight for truth and freedom.
-

6. Later Growth and Development:

- After independence, Indian-language newspapers continued to grow.
 - Major Indian-language newspapers today include:
 - **Anandabazar Patrika (Bengali)**
 - **Dainik Bhaskar (Hindi)**
 - **Malayala Manorama (Malayalam)**
 - **Eenadu (Telugu)**
 - **Dinamalar (Tamil)**
 - The Indian press now reaches rural areas and millions of people.
-

Example:

If a Bengali farmer in 1900 could not read English newspapers, he could read **Samachar Darpan** or **Sambad Kaumudi** in Bengali. This helped him learn about social reforms, British rule, and national leaders.

Conclusion:

The emergence of newspapers in India marked the beginning of a new era in communication. The growth of Indian-language press brought knowledge, nationalism, and social reform to common people. It played a powerful role in India's struggle for independence and still continues to be a pillar of democracy today.

C. Role of the press in new awakening in India and freedom struggle:

Introduction:

The press played a powerful role in India's **social awakening** and **freedom struggle**. In a time when India was under British rule and most Indians were unaware of their rights, newspapers and journals helped spread awareness, education, and the message of nationalism. The press acted as a bridge between leaders and the public and became a strong tool to fight against colonial rule.

1. Role in Social Awakening:

- In the early 19th century, many **Indian social reformers** used the press to fight against **social evils** like **child marriage, caste system, Sati, and illiteracy**.
 - **Raja Ram Mohan Roy** started **Sambad Kaumudi** in 1821 to promote women's rights, education, and social reforms.
 - The press created awareness among people about the **importance of education, scientific thinking, and rationalism**.
 - **Tattvabodhini Patrika, Kesari, and The Hindu** also wrote against outdated customs and encouraged modern thinking.
-

2. Press as a Voice Against British Rule:

- The Indian press exposed the **exploitation and injustice** done by the British rulers.
 - It raised questions on **unfair taxes, famine mismanagement, and discrimination against Indians** in jobs and administration.
 - Newspapers like **Kesari** (by Bal Gangadhar Tilak), **Amrita Bazar Patrika**, and **Bande Mataram** inspired people to fight for freedom.
-

3. Spreading Nationalism:

- The press connected freedom fighters with the masses.
 - It published speeches, articles, and letters of leaders like **Gandhiji, Nehru, Tilak, and Subhas Chandra Bose**.
 - The idea of **Swadeshi, boycott of British goods, and self-rule** was spread through newspapers.
 - Gandhiji started **Young India, Navjeevan, and Harijan**, where he wrote about non-violence, truth, and satyagraha.
-

4. Newspapers in Indian Languages:

- The Indian-language press played a key role in reaching rural and regional audiences.
 - Examples:
 - **Kesari** (Marathi)
 - **Jugantar** and **Sandhya** (Bengali)
 - **Swadesamitran** (Tamil)
 - **Al-Hilal** (Urdu) by Maulana Abul Kalam Azad
 - These papers published stories of brave revolutionaries and motivated youth to join the freedom movement.
-

5. British Control and Press Laws:

- The British government was afraid of the Indian press and passed strict laws:
 - **Vernacular Press Act (1878)** by Lord Lytton to stop criticism in Indian languages.
 - **Press Act (1910)** made it harder to publish without government permission.
 - Many editors were jailed, fined, or had their publications banned.

Despite these laws, Indian journalists and editors continued to write bravely. They saw the press as a **weapon of truth**.

6. Press During Major Movements:

- During the **Non-Cooperation Movement**, **Civil Disobedience**, and **Quit India Movement**, the press played an important role in:
 - Reporting events,
 - Guiding the people,
 - Sharing Gandhiji's ideas.
 - Underground newspapers were also printed secretly to avoid censorship.
-

Example:

When British newspapers refused to report about the **Jallianwala Bagh massacre (1919)**, Indian newspapers like *The Bombay Chronicle* exposed the truth. This shocked the people and increased support for the freedom movement.

Conclusion:

The Indian press was not just a medium of news — it was the **soul of India's awakening and struggle**. It brought light to a dark time of slavery, gave a voice to the voiceless, and united people across castes, religions, and regions. The press in India during British rule stood for **truth, justice, and independence**.

D. Role of the press in new awakening in India and freedom struggle:

Introduction:

The **British government** used many laws to **control the Indian press**, especially when the press started exposing British injustice and supporting Indian nationalism. These laws were made to **silence journalists**, **ban publications**, and **punish editors**. Some of these laws were included in the **Indian Penal Code (IPC)** and others were special acts passed only for the press.

1. Early Press Regulations:

(a) *Censorship of Press Act, 1799*

- Passed by Governor-General **Lord Wellesley**.
- Introduced **pre-censorship** of newspapers.
- Newspapers had to get approval before publishing anything.

(b) *Licensing Regulations, 1823*

- Governor-General **John Adam** passed this law.
- Required **license** to start or print a newspaper.
- **Raja Ram Mohan Roy's Mirat-ul-Akhbar** was shut down because of this.

2. Vernacular Press Act, 1878

- Introduced by **Lord Lytton**.
- Targeted **Indian-language newspapers**.
- Gave power to **confiscate printing equipment** without a trial.
- No right to appeal in court.
- Example: **Amrita Bazar Patrika** cleverly changed from Bengali to English overnight to escape this law.

3. Indian Press Act, 1910

- Brought by **Lord Minto**.
- Required all publishers to deposit **security money**.
- Government could **seize press and stop publication** if found against British rule.
- Many revolutionary papers like *Jugantar* and *Kesari* were affected.

4. Indian Penal Code (IPC) Clauses:

These laws were used to **punish journalists** for defamation, sedition, and obscenity.

I. Section 124A – Sedition

Definition:

Sedition means bringing hatred, contempt, or disaffection against the government established by law in India.

Explanation:

- Any act – spoken, written, or symbolic – that tries to incite **rebellion** against the authority of the state is considered **sedition**.
- The intention must be to create public disorder or violence against the state.

Punishment:

- Life imprisonment or
- Imprisonment up to 3 years with or without fine.

Historical Use under British Rule:

- This section was **widely misused by the British** to suppress **nationalist voices**.

Famous Case Study:

- **Bal Gangadhar Tilak (1897 and 1908):**
 - In 1897, articles in *Kesari* led to charges of sedition.
 - Tilak wrote about Shivaji and condemned British injustice.
 - Judge Strachey interpreted even strong criticism as sedition.
 - He was sentenced to **18 months imprisonment**.
 - In 1908, he was again charged and sent to Mandalay Jail in Burma for **6 years**.
- **Mahatma Gandhi (1922):**
 - Arrested for writings in *Young India*.
 - He said, "Sedition is the highest duty of a citizen under slavery."
 - Sentenced to **6 years in jail**.

Modern Relevance:

- Still a part of IPC.
- Criticized by press freedom activists for **suppressing dissent**.

- The Supreme Court (2022) paused the use of 124A and is reviewing its validity.
-

II. Section 499 & 500 – Defamation

Definition:

- Defamation means harming a person's reputation through **false statements**.
- It can be spoken (slander) or written (libel).

Section 499 IPC:

- Lays down what constitutes defamation.
- Includes exceptions like **fair criticism**, **truth for public good**, and **reporting court proceedings**.

Section 500 IPC:

- Provides punishment for defamation:
 - **Up to 2 years imprisonment**, or
 - **Fine**, or both.

Use Against the Press:

- Many journalists and editors have faced defamation cases for publishing news against powerful people.

Recent Example:

- In 2014, **Subramanian Swamy** and **Rahul Gandhi** faced defamation cases filed by political opponents.
- In 2016, the Supreme Court upheld the constitutionality of Section 499 and 500.

Importance for Journalists:

- Journalists must **verify facts carefully**.
 - Fair and truthful criticism of public figures is allowed.
-

III. Section 292 – Obscenity

Definition:

- Printing, publishing, selling, or circulating material that is **lascivious**, appeals to **sexual desires**, or **corrupts public morals** is a crime.

Punishment under Section 292:

- First conviction: **Up to 2 years in jail**, or **fine up to ₹2000**, or both.
- Second conviction: **Up to 5 years jail**, or **fine up to ₹5000**, or both.

Examples of Material Covered:

- Sexually explicit photos, stories, songs, or advertisements.
- Also applies to **films**, **books**, and **online content**.

Case Study:

- **Ranjit Udeshi v. State of Maharashtra (1965):**
 - A bookshop owner sold D.H. Lawrence's novel *Lady Chatterley's Lover*.
 - Supreme Court held it **obscene** and upheld the punishment.

Modern Challenges:

- With digital media, defining what is "obscene" has become complex.
 - Freedom of expression vs. public morality is a key debate.
-

IV. Section 153A – Promoting Enmity Between Groups

Definition: Publishing or speaking anything that promotes **hatred between groups** based on **religion, race, language, caste, or place of birth**.

Punishment: Up to **3 years jail**, or fine, or both. If committed in a place of worship: **5 years imprisonment**.

Use Against the Press: Used to stop **hate speech** in media. But also **misused** to harass independent journalists.

V. Section 295A – Hurting Religious Sentiments

Definition: Deliberate and malicious acts intended to **insult the religion or beliefs of any class**.

Punishment: Up to **3 years jail**, or fine, or both.

Example: Used in cases where newspapers or TV channels show content that is seen as offensive to a particular religion.

VI. Press Laws Related to These IPC Sections:

(a) Press (Objectionable Matters) Act, 1951

- Gave power to ban publications that promoted hatred, sedition, or obscenity.

(b) Cinematograph Act, 1952

- Applied to films, but the **same principles of obscenity and sedition** are considered while censoring news or documentaries.
-

5. Press (Emergency Powers) Act, 1931

- Came during the Civil Disobedience Movement.
 - Allowed the government to **stop any publication** that encouraged rebellion or hatred.
 - Gave police power to **raid newspaper offices**.
-

6. Impact on Indian Press:

- These laws were used to **suppress freedom of expression**.
 - Many editors were jailed, fined, or their presses were shut down.
 - **But Indian journalists continued bravely**, and newspapers became the **voice of the people**.
-

Conclusion:

The British used many **press regulation laws** and IPC sections like **Sedition (124A)**, **Defamation (499–500)**, and **Obscenity (292)** to control the press. But these laws could not stop the Indian press from supporting **freedom, justice, and truth**. Newspapers like *Kesari*, *Amrita Bazar Patrika*, and *Young India* continued to **inspire people and spread the message of independence**.

E. International news agencies:

Introduction: International news agencies are organizations that gather and distribute news from around the world. These agencies provide newspapers, magazines, radio, television, and online media with timely, reliable, and wide-ranging global news coverage. They play an essential role in shaping global communication and journalism.

Definition: An international news agency is a media organization that collects, edits, and supplies news reports to media outlets across national borders. Their primary function is to report global news in real-time.

Key Functions:

- Gathering and verifying news from different parts of the world.
- Distributing news through satellite, internet, and wire services.
- Ensuring quick, accurate, and unbiased reporting.
- Offering coverage on politics, conflict, disaster, sports, business, and human interest stories.

Major International News Agencies:

1. Reuters (UK):

- **Founded:** 1851 by Paul Reuter in London.
- **Current Ownership:** Part of Thomson Reuters Corporation.
- **Specialization:** Business, financial markets, legal, tax, and media.
- **Offices:** Present in over 100 countries.
- **Notable Fact:** First to use pigeons and telegraph for fast news delivery.
- **Reference:** "Thomson Reuters Fact Book 2023".

2. Associated Press (AP) – USA:

- **Founded:** 1846 as a non-profit cooperative.
- **Headquarters:** New York City.
- **Ownership:** Member newspapers and broadcasters.
- **Services:** Text, video, and photo news.
- **Notable Work:** Won multiple Pulitzer Prizes for investigative journalism.
- **Reference:** <https://www.ap.org/about/>

3. Agence France-Presse (AFP) – France:

- **Founded:** 1835 by Charles-Louis Havas; became AFP in 1944.
- **Headquarters:** Paris, France.
- **Language Services:** English, French, Arabic, Spanish, Portuguese.
- **Reference:** AFP official website: www.afp.com

4. Xinhua – China:

- **Founded:** 1931 as Red China News Agency.
- **Ownership:** State-owned by the Chinese government.
- **Role:** China's official voice in international media.
- **Coverage:** Present in 180+ countries.
- **Reference:** Xinhua News Agency English site: www.xinhuanet.com/english

5. TASS – Russia:

- **Founded:** 1904, formerly ITAR-TASS.
- **Ownership:** State-run agency.
- **Services:** News, photo, and video services.
- **Reference:** TASS official site: www.tass.com

6. Deutsche Presse-Agentur (DPA) – Germany:

- **Founded:** 1949.
- **Ownership:** Owned by German media companies.
- **Services:** News in German, English, Spanish, and Arabic.
- **Reference:** <https://www.dpa.com/en>

7. **Kyodo News – Japan:**

- **Founded:** 1945.
- **Ownership:** Non-profit cooperative of Japanese newspapers.
- **Focus:** Japanese and Asia-Pacific region news.
- **Reference:** <https://english.kyodonews.net/>

Importance of International News Agencies:

- **Reliable Sources:** Serve as primary sources for accurate, real-time international news.
- **Global Reach:** Connect remote regions to the global audience.
- **Speed:** Deliver breaking news faster than most independent media.
- **Collaboration:** Share news with regional agencies like PTI (India), ANI, and others.

Criticisms and Ethical Concerns:

- **Western Bias:** Reuters, AP, and AFP have been criticized for promoting Western perspectives.
- **State-Controlled Agencies:** Like Xinhua and TASS are often accused of promoting government propaganda.
- **Under-representation:** Developing nations and minority communities may receive less coverage.

Conclusion: International news agencies are the backbone of global journalism. They make it possible for citizens around the world to stay informed about international affairs. Despite criticisms, their role in sharing news, supporting democratic transparency, and building global awareness remains essential.

Unit: 2

A. Invention and spread of the Radio

Introduction:

Radio is one of the oldest and most powerful tools of mass communication. It allows the transmission of sound through electromagnetic waves without using wires. Radio played a very important role in modern communication, especially in countries like India where literacy was low, and people needed a medium that was easy to access and understand.

Invention of the Radio (World Overview):

- **James Clerk Maxwell** (UK, 1864): He first predicted the existence of electromagnetic waves.
 - **Heinrich Hertz** (Germany, 1886): He demonstrated how these waves work, and today the unit “Hertz” is used to measure radio frequencies.
 - **Guglielmo Marconi** (Italy, 1895): He sent the first wireless signal and got the first patent for the radio. He sent messages across the Atlantic Ocean in 1901.
 - **Nikola Tesla** (USA): He also worked on wireless communication and contributed important scientific work.
-

Early Use of Radio:

- In the early 1900s, radio was used for military and marine communication.
 - During **World War I**, it became important for war communication.
 - After the war, countries started using it for public broadcasting.
-

Spread of Radio in the World:

- **First public radio station:** KDKA in Pittsburgh, USA (1920).
 - Followed by BBC in the UK (1922), and other European countries.
 - Content included music, news, education, and religious programs.
-

History of Radio in India:

1. First Broadcasts:

- In **1923**, the **Radio Club of Bombay** made the first radio broadcast in India.
- In **1927**, two private stations were set up – **Bombay** and **Calcutta**.

2. Government Control:

- In **1930**, the British Indian government took over radio broadcasting and named it **Indian Broadcasting Service (IBS)**.
- In **1936**, it was renamed **All India Radio (AIR)**.

3. Objectives of AIR:

- To inform, educate, and entertain.
- To promote national integration and Indian culture.
- To reach rural and urban populations.

Radio During Indian Freedom Movement:

- The British used radio to spread their own messages.
- But Indian freedom fighters also used it.
- In **1942**, during the **Quit India Movement**, **Usha Mehta** started the **Secret Congress Radio** to spread messages of freedom.

Post-Independence Growth:

- After 1947, AIR became the national public radio broadcaster.
- The motto of AIR: **"Bahujan Hitaya, Bahujan Sukhaya"** (for the welfare of the masses).
- New radio stations were opened in different parts of the country.
- Programs were made in different Indian languages to reach all communities.

Special Role of Radio in India:

- **Education:** Radio became a useful tool in spreading adult education and agricultural knowledge in villages.
- **Emergency Communication:** During wars, floods, and natural disasters, radio helped in giving emergency messages.
- **Cultural Unity:** AIR promoted Indian music, classical arts, and languages from different states.

Technological Growth:

- Introduction of **transistor radios** in the 1960s made radio affordable and portable.
- **Radio reached remote villages** where no newspaper or TV reached.
- Later, **FM radio** and **community radios** further increased reach.

Conclusion:

The invention and spread of radio changed communication forever. In India, radio was not only a source of entertainment but also a tool of education, culture, and national unity. It helped connect rural and urban areas and became the **voice of the common people**.

Even in today's digital age, radio continues to play an important role, especially through FM and community radio stations.

B. Development of All India Radio

Introduction:

All India Radio (AIR) is the national public radio broadcaster of India. It is one of the largest radio networks in the world. AIR has played a major role in spreading news, education, culture, and entertainment across the country.

Early History of AIR:

- 1923: First radio broadcast in India by Radio Club of Bombay.

- 1927: Two private stations were started – one in Bombay and one in Calcutta.
- 1930: The British government took over radio broadcasting and named it Indian Broadcasting Service (IBS).
- 1936: IBS was renamed All India Radio (AIR).

AIR became a government-owned and controlled service. Its motto is:

“Bahujan Hitaya, Bahujan Sukhaya”

(For the welfare and happiness of the many.)

Development During British Rule:

- AIR was mainly controlled by the British.
- It was used to spread British propaganda during World War II.
- Indian leaders had limited access to radio.

But Indian freedom fighters used alternative means, like Secret Congress Radio (started by Usha Mehta in 1942), to reach the people.

Post-Independence Growth:

After India got independence in 1947, the Government of India took full control of AIR.

Key Developments:

1. Expansion of Stations:
 - In 1947, AIR had only 6 stations.
 - By 1950, it had 12 stations.
 - Today, it has over 400 stations reaching 99.2% of India's population.
 2. Vivid Bharati (1957):
 - Started for entertainment programs, including music and film songs.
 - It became very popular in both rural and urban India.
 3. Educational Programs:
 - AIR started broadcasting school and college lessons.
 - It supported adult education, health awareness, and agriculture information.
 4. Regional Services:
 - AIR broadcasts in more than 20 languages and over 180 dialects.
 - It helped in preserving India's cultural diversity.
 5. News Services:
 - AIR became a trusted source of news.
 - National, international, regional, and rural news bulletins are broadcast.
-

Technological Growth:

- AIR introduced FM radio in the 1990s.
 - Use of satellite and internet increased the reach.
 - Digital audio broadcasting (DAB) was tested for better sound quality.
-

AIR in Rural Development:

- AIR plays a special role in reaching farmers and villagers.
- Broadcasts include Krishi Darshan, rural development talks, weather reports, and market prices.
- Helps in bridging the information gap between cities and villages.

AIR in National Integration:

- AIR promotes unity in diversity by broadcasting different regional content.
 - It plays patriotic songs, messages from the Prime Minister, and special national programs on Independence Day and Republic Day.
-

Conclusion:

All India Radio has helped in nation-building. From the time of independence to now, AIR has served as a powerful public service medium for the people of India. It has promoted education, awareness, and entertainment, and continues to be a trusted voice of the nation.

C. Expansion of the FM channels and Community Radio

Introduction:

FM Radio and Community Radio are two important forms of broadcasting that have helped in **bringing radio closer to the people**. These radio services offer **local content, better sound quality**, and reach people in a way that national channels cannot. They play a very important role in **information, education, and entertainment** at the grassroots level.

What is FM Radio?

- FM means **Frequency Modulation**.
 - FM radio gives **clear sound quality** and is **less affected by noise**.
 - FM stations mostly play **music, news, public service programs**, and are very **popular in cities and towns**.
-

History and Growth of FM Radio in India:

1. Introduction:

- FM broadcasting started in **1977** in India, but it was not very popular at first.
- It became more popular in the **1990s**, especially after liberalization.

2. Phase I (2001):

- The government allowed **private players** (companies) to start FM radio.
- 21 private channels were started in **12 cities**.

3. Phase II (2005):

- Huge expansion: more than **240 private FM channels** started across **90 cities**.
- These FM stations became very popular for **music, entertainment, RJ shows**, etc.

4. Phase III (2015):

- FM was allowed in more **cities and small towns**.
- FM stations were allowed to **broadcast news** from AIR.
- Over **800 licenses** were granted.

5. Present Day:

- FM is available in **hundreds of Indian cities and towns**.

- Popular FM stations: **Radio Mirchi, Red FM, Big FM, Radio City**, etc.
 - FM is now also available on **mobile phones** and **apps**.
-

Importance of FM Radio:

- Useful for **entertainment and lifestyle** content.
 - RJs (Radio Jockeys) became local celebrities.
 - FM is **affordable** and reaches people in their **local language**.
 - Used for **government announcements**, awareness campaigns (e.g., COVID-19, elections).
-

What is Community Radio?

- Community Radio is a **small, non-profit radio station** set up for a **specific community**.
 - It is managed by **schools, colleges, NGOs, farmers' groups, women's groups**, etc.
 - Main goal is to **empower local people** by giving them a voice.
-

Growth of Community Radio in India:

1. **2002:** Government allowed **educational institutions** to start community radios.
 2. **2006:** Policy expanded to include **NGOs, cooperatives, and other community-based groups**.
 3. **By 2023:** Over **400 community radio stations** were working in different parts of India.
-

Features of Community Radio:

- Broadcasts are made in **local languages and dialects**.
 - Focus on **local problems, culture, farming tips, health care, and women's issues**.
 - Content is produced **by the community and for the community**.
 - Stations have **limited power** (range of 10-15 km).
-

Examples of Community Radio in India:

- **Radio Ujjas (Kutch, Gujarat)** – Women's rights.
 - **Radio Bundelkhand (Madhya Pradesh)** – Agriculture and rural development.
 - **Kalanjiam Samuga Vanoli (Tamil Nadu)** – Health, education, and self-help groups.
 - **Alwar Ki Awaz (Rajasthan)** – Focus on local governance and social issues.
-

Importance of Community Radio:

- Gives **voice to the voiceless**.
 - Encourages **local participation** and development.
 - Useful during **natural disasters** for emergency alerts (like during floods and cyclones).
 - Promotes **local culture and traditions**.
-

Conclusion:

The expansion of FM channels and community radio has **strengthened India's radio landscape**. FM radio is popular in urban areas for music and entertainment, while community radio serves rural and underprivileged people by addressing local issues. Together, they help make radio **more inclusive, participatory, and powerful** in spreading knowledge and joy across India.

D. Invention and spread of the television with focus on India

Introduction:

Television (TV) is one of the most powerful mass communication tools. It combines **audio and visuals**, making it very effective for **education, entertainment, and information**. The invention of television changed the way people get news and entertainment across the world, including in India.

Invention of Television (Globally):

- The idea of television started in the **late 19th century**.
- **John Logie Baird** of Scotland is known as the inventor of the **first working television**.
 - In **1926**, he demonstrated the world's first **live TV transmission**.
- **Philo Farnsworth** (USA) also developed electronic TV systems around the same time.

Television spread slowly from **Europe and America** to the rest of the world.

Beginning of Television in India:

- Television started in **India on 15th September 1959**.
 - The first experiment was done by **All India Radio (AIR)** in **Delhi** with help from **UNESCO**.
 - It was called **Doordarshan (DD)** – the national TV service of India.
-

Growth and Development of Indian Television:

1960s:

- In 1965, Doordarshan began **daily telecasts** for **educational purposes**.
- TV was available only in **Delhi** at this time.

1970s:

- In **1972**, services started in **Mumbai**.
- In **1975**, TV service began in **Calcutta, Chennai, Srinagar, Amritsar**, and other cities.
- A special program called "**Krishi Darshan**" was launched for farmers.
- In **1975–76**, the government launched the **Satellite Instructional Television Experiment (SITE)** to use satellite TV for rural education in six states.

1980s:

- Color television was introduced in **1982**, during the **Asian Games in Delhi**.
 - Doordarshan became popular with programs like:
 - **Hum Log, Buniyaad, Ramayan, Mahabharat, Chitrahaar, News in Hindi and English**.
 - It became a **unifying force** in Indian society.
-

Liberalization and Private Channels – 1990s Onwards:

- In **1991**, India's economy was liberalized.
- This allowed **private and foreign TV channels** to enter India.

Major Developments:

- **Zee TV** started in 1992 – the first private Indian satellite channel.
 - **Star Plus, Sony, Sun TV, Aaj Tak, NDTV**, and others followed.
 - 24-hour **news channels, music, sports, kids' shows**, and **regional channels** began.
-

Modern Era of Television in India:

- India now has **over 900 TV channels**, in **multiple languages**.
 - Cable and DTH (Direct to Home) services have reached **urban and rural households**.
 - **TV digitization** and **HD channels** offer better quality.
 - **Online platforms (OTT)** like Hotstar, Netflix, Zee5, and SonyLIV are also becoming popular, but **TV still remains strong**, especially in rural India.
-

Impact of Television in India:

1. **Education:**
 - Shows for students, farmers, and adults.
 - Government uses TV for awareness programs.
 2. **Culture and Unity:**
 - Promotes Indian culture and values.
 - National festivals and events reach everyone.
 3. **News and Awareness:**
 - Informs people about national and international issues.
 4. **Entertainment:**
 - Serials, films, reality shows, and sports make TV the main source of entertainment.
-

Conclusion:

Television in India started as a small educational service but has now grown into a **massive communication medium**. From Doordarshan to hundreds of satellite channels, television has changed the **social, cultural, and political life** of Indians. It is still a **powerful tool for public awareness, education, and entertainment** across the country.

E. Press Commissions and Press Council of India

Press Commissions in India

Introduction:

After India became independent in 1947, there was a need to study and improve the condition of the Indian press. To do this, the Government of India formed **two Press Commissions**—one in **1952** and another in **1978**. These Commissions studied the problems of newspapers, journalists, and media houses and gave important suggestions for making the press more responsible and independent.

1st Press Commission (1952–1954)

- **Chairman:** Justice J.S. Rajadhyaksha
- **Year Formed:** 1952
- **Report Submitted:** 1954

Objectives:

- To understand the condition of Indian newspapers and journalism after independence.
- To suggest how to maintain the **freedom of the press** and **improve journalism ethics**.

Important Recommendations:

- Formation of a **Press Council** to check unethical journalism.
- Establishment of **journalism training institutes** in India.
- Newspapers should avoid being influenced by **political parties** or **industrialists**.
- Suggested fair **wage boards** for working journalists.
- News should be **fact-based and neutral**.

This Commission helped shape the foundation of modern journalism in India and created awareness about the need for **press responsibility**.

2nd Press Commission (1978–1982)

- **Chairman:** Justice K.K. Mathew
- **Year Formed:** 1978
- **Report Submitted:** 1982

Objectives:

- To examine how the media changed after 25 years of independence.
- To study the impact of **advertisements, political interference, and new technology**.
- To improve **journalism education and press freedom**.

Important Recommendations:

- Strengthening the powers of the **Press Council of India**.
 - Encouraged growth of **regional and rural journalism**.
 - Suggested **public ownership** of big newspapers to reduce monopoly.
 - Recommended better **working conditions and salaries** for journalists.
 - Emphasized that the press should focus on **public interest, not profit**.
-

Impact of the Commissions:

- Helped in setting up the **Press Council of India** in 1966.
 - Improved the **ethical standards** of newspapers.
 - Promoted **freedom of the press with responsibility**.
 - Supported **training and education** for young journalists.
-

Conclusion:

The two Press Commissions played a very important role in the **development of journalism** in India. They provided a roadmap for making the press **independent, professional, and ethical**. Their recommendations still influence media policies today. These commissions ensured that the **press serves the people and protects democracy**.

Press Council of India

Introduction:

The **Press Council of India (PCI)** is a **statutory and autonomous body** that works to **protect the freedom of the press and improve the standards of journalism** in India. It acts like a **watchdog** of the press and ensures that the media works **responsibly, ethically, and independently**.

Background:

The need for a regulatory body for the press was first suggested by the **First Press Commission** in 1954. As a result, the **Press Council of India** was established in **1966** under the **Press Council Act, 1965**. However, during the Emergency in 1975, the PCI was abolished. It was later re-established in **1979** after the Emergency ended.

Structure of PCI:

- The **Chairman** is always a **retired judge of the Supreme Court of India**.
- Other members include:

- **Editors and journalists**
 - **Owners of newspapers**
 - **Members of Parliament**
 - **Representatives of public and legal bodies**
 - **Total strength: 28 members**
-

Functions of the Press Council of India:

1. **To protect the freedom of the press**
 - PCI ensures that newspapers and journalists can express their views **without fear or pressure** from government, political parties, or business houses.
 2. **To maintain ethics and standards of journalism**
 - PCI checks if newspapers are following **truth, fairness, and accuracy** in news reporting.
 3. **To handle complaints**
 - If someone (reader or public) feels that a newspaper has published **false or unethical** news, they can **complain to PCI**.
 - PCI investigates and can issue a warning or criticism.
 4. **To guide journalists**
 - PCI gives **codes of conduct** for journalists to follow so that their reporting helps society.
-

Powers of the PCI:

- PCI can **summon people, ask for documents, and conduct inquiries** like a civil court.
 - It can **warn, censure (criticize) or advise** newspapers or journalists.
 - But it **cannot punish, fine, or close** a newspaper.
-

Limitations of PCI:

- PCI has **no control over TV news, radio, or digital media**—only print media (newspapers and magazines).
 - Its decisions are **not legally binding**.
 - It has **no power to take legal action** against journalists or publishers.
-

Important Examples:

- PCI has raised voice against **paid news, fake news, communal reporting, and media trials**.
 - It also encourages journalists to report with **integrity during elections and national events**.
-

Conclusion:

The Press Council of India is very important for **preserving democracy**. It ensures that journalists use their **freedom with responsibility**. Even though it has some limitations, the PCI plays a big role in **shaping honest, ethical, and free journalism** in India.
