

End-Semester Examination - 2024 (Autumn)

STAUGMCC1101

(Probability – I)

Semester – I (4 Year B.Sc. in Statistics)

Full Marks – 80

Time – 3 Hours

Notations and symbols have their usual meaning.

Section A. Answer ALL questions. Each question carries one mark.

1. In a single toss of a fair coin, what is the sample space?
 (a) {H} (b) {T} (c) {H, T} (d) {H, H}
2. The classical definition of probability assumes that:
 (a) All events are equally likely (b) Outcomes are not equally likely
 (c) Probability depends on past events (d) Events cannot be measured
3. If $P(A) = 0.3$, $P(B) = 0.4$, and $P(A \cap B) = 0.1$, what is $P(A \cup B)$?
 (a) 0.1 (b) 0.2 (c) 0.4 (d) 0.5
4. Bayes' theorem is used to:
 (a) Find the probability of independent events
 (b) Update the probability based on new information
 (c) Solve for skewness
 (d) Prove random variable properties
5. A random variable X that can take only a finite or countably infinite set of values is called:
 (a) Uniform random variable
 (b) Discrete random variable
 (c) Normal random variable
 (d) Exponential random variable
6. The cumulative distribution function (CDF) $F(x)$ is:
 (a) $F(x) = P(X > x)$
 (b) $F(x) = P(X = x)$
 (c) $F(x) = P(X \leq x)$
 (d) $F(x) = 1 - P(X \leq x)$
7. Which of the following is true for a binomial distribution?
 (a) Trials are dependent
 (b) Each trial has more than two outcomes
 (c) Probability of success remains constant
 (d) Number of trials is infinite

8. The mathematical expectation $E(X)$ of a discrete random variable X is:

- (a) $\sum x_i P(X = x_i)$
- (b) $\int x f(x) dx$
- (c) $P(X > x)$
- (d) $\frac{\lambda}{P(x)}$

9. Which of the following is a characteristic of the Poisson distribution?

- (a) It models rare events
- (b) It is defined over continuous intervals
- (c) It cannot be used for small probabilities
- (d) Mean and variance are always equal to 0

10. If $P(A \cap B) = 0.2$ and $P(B) = 0.5$, what is $P(A|B)$?

- (a) 0.1
- (b) 0.2
- (c) 0.4
- (d) 0.5

Section B. Answer ALL questions. Each question carries one mark.

- ✓ 11. Define a random experiment with an example.
- ✓ 12. What is a sample space? Give an example.
- ✓ 13. State the classical definition of probability.
- ✓ 14. Write the formula for the probability of the union of two events A and B .
- ✓ 15. Define the conditional probability of event A given B with the help of $P(A)$, $P(B)$ and $P(A \cap B)$.
- ✓ 16. State Bayes' theorem.
- ✓ 17. Differentiate between a discrete random variable and a continuous random variable.
- ✓ 18. Write the probability mass function (p.m.f.) for a binomial distribution.
- ✓ 19. Write the formula for variance of a random variable X in terms of expectation.
- ✓ 20. Define skewness.

Section C. Answer any SIX questions. Each question carries 10 marks.

- ✓ 21. (a) Prove that for any two events A and B , the probability of their union is:

$$P(A \cup B) = P(A) + P(B) - P(A \cap B)$$

- (b) A fair die is rolled twice.

i. Write the sample space for the experiment.

0-68787

4. Find the probability of getting a total of 7 on the two dice.

5

(a) What is the probability that in a group of 23 people, at least two share the same birthday? $\frac{1}{50.55}$

(b) A family has two children. One of them is a girl. What is the probability that both children are girls? $\frac{1}{3}$

23. (a) A bag contains 3 red balls, 4 green balls, and 5 blue balls. A ball is selected at random.

- What is the probability that the ball is red?
- What is the probability that the ball is not green?

5

(b) State and prove the Law of Total Probability.

5

(a) Prove Bayes' Theorem.

5

(b) Two cards are drawn from a deck of 52 cards without replacement. What is the conditional probability that the second card is an ace, given that the first card is a king? $\frac{1}{51}$

5

25. (a) Two fair coins are tossed simultaneously.

- Are the events "getting a head on the first coin" and "getting a tail on the second coin" independent?
- Justify your answer using the definition of independence.

5

(b) The random variable X has the following probability mass function (pmf):

$$P(X=x) = \begin{cases} \frac{x}{15}, & \text{for } x = 1, 2, 3, 4, 5 \\ 0, & \text{otherwise} \end{cases}$$

- Verify that this is a valid pmf.
- Calculate $P(X \leq 3)$.

Handwritten calculations for pmf verification:
 $\sum_{x=1}^5 \frac{x}{15} = \frac{1}{15} + \frac{2}{15} + \frac{3}{15} + \frac{4}{15} + \frac{5}{15} = \frac{15}{15} = 1$
 $P(X \leq 3) = \frac{1}{15} + \frac{2}{15} + \frac{3}{15} = \frac{6}{15} = \frac{2}{5}$

26. (a) The function of a random variable X at x is given as:

$$F(x) = \begin{cases} 0, & \text{for } x < 0 \\ \frac{x}{2}, & \text{for } 0 \leq x \leq 2 \\ 1, & \text{for } x > 2 \end{cases}$$

constant = 1

Check $F(x)$ is a cumulative distribution function (CDF).

(b) Calculate the mean of the binomial distribution

27. (a) A book has on average 5 misprints per page. What is the probability that a randomly selected page has exactly 3 misprints?

5

(b) Write the pmf of a geometric distribution. Calculate the mean of X .

5

28. (a) Define the moment generating function (MGF) of a random variable X .

3

Handwritten calculations for MGF:
 $M_X(t) = E[e^{tx}] = \sum_{k=0}^{\infty} \frac{e^{tk}}{k!} P(X=k)$
 $M_X(t) = \sum_{k=0}^{\infty} \frac{e^{tk}}{k!} \left(\frac{1}{2} \right)^k \left(\frac{1}{2} \right) = \frac{1}{2} \sum_{k=0}^{\infty} \frac{(e^t)^k}{k!} = \frac{1}{2} e^t$

(b) The heights of students in a school are normally distributed with mean 160 cm and standard deviation 10 cm.

- i. What is the probability that a randomly selected student has a height greater than 170 cm?
- ii. What is the probability that the height of a randomly selected student lies between 150 cm and 170 cm?

[3+4]

✓ 29 ✓ (a) Find the mgf of $N(\mu, \sigma^2)$

(b) State and prove Chebyshev's Inequality. ✓

———— End ————

(A1113) 5
5
/ (A1113)

End-Semester Examination - 2024 (Autumn)
STAUGMCC1102
(Demography and Vital Statistics)
Semester – I (4 Year B.Sc. Honours in Statistics)

Full Marks – 60

Time – 2 Hours 30 Minutes

Notations and symbols have their usual meaning.

Section A. Answer ALL questions. Each question carries one mark.

1. Crude birth rate (CBR) without multiplicative constant is

a) $\frac{\text{Total birth}}{\text{Total population}}$

b) $\frac{\text{Total birth}}{\text{Total female population}}$

c) $\frac{\text{Total female birth}}{\text{Total female population}}$

d) $\frac{\text{Total female birth}}{\text{Total population}}$

2. q_x column of a Life Table is

(a) Probability that a person of exact age x will survive at least age $x + 1$

(b) Probability that a person of exact age x will survive age $x + 1$ but die before reaching age $x + 2$

(c) Probability that a person of exact age x will die before reaching age $x + 1$

(d) Probability that a person survive till age x

3. Infant mortality rate without multiplicative constant is

a) $\frac{\text{number of deaths among children of age 0 l.b.d.}}{\text{number of live births}}$

b) $\frac{\text{number of deaths among children of age 1 l.b.d.}}{\text{number of live births}}$

c) $\frac{\text{number of deaths among children of age group 0-5}}{\text{number of live births}}$

d) $\frac{\text{number of deaths among children of age 0 l.b.d.}}{\text{number of births including still birth}}$

4. Linear growth of population may be written as

a) $P_t = a + bt$

b) $P_t = a + bt + ct^2$

c) $P_t = ab^t$

d) $P_t = e^{a+bt}$

5. T_x column of a life table can be written as

a) $T_x = l_x + l_{x+1} + \dots$

b) $T_x = L_x + L_{x+1} + \dots$

c) $T_x = d_x + d_{x+1} + \dots$

d) $T_x = \frac{d_x}{l_x}$

6. In an age data, it is suspected that the numbers ending with 0 and 5 are reported the most. To detect whether actually the suspicion is correct or not, one may use:

a) Pearl's Vital Index

b) Whipple's Index

c) Basu's Index

d) Differential Index

7. To detect the errors in age data, the blended population method is used in

a) Vital Index

b) Myer's Index

c) UN Index

d) Whipple's Index

8. Age Dependency Ratio involved dependent age group, which is:

a) under 65 and over 15

b) between 18 to 65

c) under 15 and over 65

d) None of the above

9. In general population pyramid considers

a) Age data only

b) Sex data only

c) Both age and sex data

d) None of the above

10. In general a life table contains

- a) a cross section of observations at a particular time
- b) the follow up information of a particular individual
- c) the follow up information of a Cohort
- d) None of the above

Section B. Answer ALL questions. Each question carries one mark.

11. ~~(a)~~ What do you mean by vital event? Give example.

(c)

$$C.F.R = \frac{w_1}{w_1 + w_2}$$

~~(b)~~ What are the sources of vital statistics data?

(c) What is rate of vital event?

~~(d)~~ Define crude death rate.

~~(e)~~ What is general fertility rate?

~~(f)~~ What do you mean by mis-reporting in age data?

~~(g)~~ What are the limitations of Myer's Index?

~~(h)~~ What is sex ratio and sex ratio at birth? Why the later is mentioned separately?

16
10
26

~~(i)~~ What is average male age ratio score?

(j) What is expectation of life?

Section C. Answer any FOUR questions. Each question carries 10 marks.

12. (a) Briefly discuss (i) Gross Reproduction Rate, (ii) Net Reproduction Rate.

3+3

(b) Distinguish between morbidity incidence rate and morbidity prevalence rate.

4

~~13.~~ Write a note on (i) Specific death rate, (ii) Standardised death rate, (iii) Maternal mortality rate, (iv) Total fertility rate.

$4 \times 2.5 = 10$

~~14.~~ (a) Explain logistic curve for population growth.

20

5

(b) Briefly discuss the method of Rhodes for fitting the logistic curve.

35
30
25
20

5

15. (a) Briefly discuss different parts of a life table.

7

(b) Prove that $np_x = p_x p_{x+1} \dots p_{x+n-1}$

3

~~16.~~ (a) Write a note on stationary and stable population mentioning their similarities and dissimilarities.

5

(b) What do you mean by coverage and content errors in demography data?

5

17. (a) What is Whipple's Index? Briefly describe how this is used to detect the errors in life table data.

5

(b) Write a note on population pyramid.

5

————— End —————

End-Semester Examination - 2024 (Autumn)

MATUGMCC1101 & MATUGMIN1101

(Differential and Integral Calculus)

Semester – I (4 Year B.Sc. Honours in Mathematics, Statistics & Physics)

Full Marks – 80

Time – 3 Hours

Notations and symbols have their usual meaning.

Section A. Answer ALL questions. Each question carries one mark.

1. The envelope of the family of straight lines $y = mx + \frac{5}{m}$ is

- (a) $y^2 = 10x$
 (b) $y^2 = 20x$
 (c) $y^2 = 5x$
 (d) $y^2 = x$

$$10x^2 + \frac{5}{10x}$$

$$mx + \frac{5}{m}$$

The point on the curve $\sqrt{x} + \sqrt{y} = 2$, where the tangent is equally inclined to the co-ordinate axis is

- (a) (1,2)
 (b) (1,1)
 (c) (0,4)
 (d) (2,5)

$$\frac{dy}{dx} = \frac{1}{2\sqrt{x}}$$

3. The pedal equation of $r = e^\theta$ is

- (a) $p^2 = r$
 (b) $p^2 = r^2$
 (c) $2p^2 = r^2$
 (d) $p^2 = 2r^2$

$$r = e^\theta$$

4. The number of normals to the curve $x^2 = 4y$ which pass through (1,2) is

- (a) 0
 (b) 1
 (c) 2
 (d) more than 2

$$x^2 = 4y$$

5. The radius of curvature of the curve $x + y = 1$ is

- (a) 0
 (b) 1
 (c) 2
 (d) ∞

$$\frac{d^2y}{dx^2} = -1$$

6. If $f(2a - x) = f(x)$ then $\int_0^{2a} f(x) dx =$

(a) $2 \int_0^a f(x) dx$

(b) $2 \int_0^a f(-x) dx$

(c) $\int_0^a f(x) dx$

(d) 0

7. The area bounded by the curve $r = f(\theta)$ and the radii vectors $\theta = \alpha$ and $\theta = \beta$ is given by

(a) $\int_\alpha^\beta r^2 d\theta$

(b) $\frac{1}{2} \int_\alpha^\beta r^2 d\theta$

(c) $\int_\alpha^\beta r d\theta$

(d) $\frac{1}{2} \int_\alpha^\beta r d\theta$

8. If $I_n = \int_0^{\pi/2} \cos^n x dx$ and $I_n = \lambda I_{n-2}$ then $\lambda =$

(a) $\frac{n}{n+1}$

(b) $\frac{n}{n-1}$

(c) $\frac{n-1}{n}$

(d) $\frac{n+1}{n}$

9. The length of the arc of the curve $y = \cosh x$ between $x = 0$ and $x = 1$ is

(a) $\cosh 1$

(b) $\cos 1$

(c) $\sinh 1$

(d) $\sin 1$

10. The volume generated by revolving about x -axis, the area bounded by $y = x^3$ between $x = 0$ and $x = 1$ is

(a) $\frac{\pi}{7}$

(b) $\frac{2\pi}{7}$

(c) $\frac{\pi}{6}$

(d) $\frac{\pi}{5}$

Section B. Answer ALL questions. Each question carries one mark.

11. Find the n -th derivative of the function $y = (a - bx)^m$. ✓

12. If $f(x) = x^n$, prove that $f(1) + \frac{f'(1)}{1!} + \frac{f''(1)}{2!} + \dots + \frac{f^{(n)}(1)}{n!} = 2^n$. ✓

13. Show that the radius of curvature of a circle at any point is a constant.

14. Show that the chord of curvature parallel to the axis of y of the curve $y = a \log \sec(x/a)$ is a constant. ✓

15. Show that for the curve $r = e^\theta$, the polar sub-tangent is equal to the polar subnormal.
16. Trace the curve $r = a \cos 2\theta$.
17. Prove that $\int_a^b f(x) dx = \int_a^b f(a+b-x) dx$.
18. Prove that the area of the region bounded by the parabola $y^2 = 4x$ and its latus rectum is $\frac{8}{3}$.
19. What is the intrinsic equation of $y = c \cosh \frac{x}{c}$?
20. Find the surface area of the whole surface generated by revolving the circle $x^2 + y^2 = 1$ round the x -axis.

Section C. Answer any SIX questions. Each question carries 10 marks.

21. (a) Prove that $D^n(\tan^{-1} x) = (-1)^n (n-1)! \sin^n \theta \sin n\theta$, where $\cot \theta = x$. 5
 (b) State Leibnitz's theorem for the n -th derivative of the product of two functions. Use it to prove $y_n = \frac{(n-1)!}{x}$, where $y = x^{n-1} \log x$. 5
22. (a) If $y = \tan^{-1} x$, show that $(1+x^2)y_{n+1} + 2nxy_n + n(n-1)y_{n-1} = 0$. Also, find $y_n(0)$. 5
 (b) Obtain the reduction formula for $\int_0^{\frac{\pi}{2}} \sin^m x \cos^n x dx$. Use it to evaluate $\int_0^{\frac{\pi}{2}} \cos^4 x \sin^2 x dx$. 5
23. (a) If ρ_1 and ρ_2 be the radii of curvature at the ends P and D of conjugate diameters of the ellipse $\frac{x^2}{a^2} + \frac{y^2}{b^2} = 1$, then prove that $(ab)^{\frac{2}{3}} (\rho_1^{\frac{2}{3}} + \rho_2^{\frac{2}{3}}) = a^2 + b^2$. 5
 (b) Show that the pedal equation of the astroid $x^{\frac{2}{3}} + y^{\frac{2}{3}} = a^{\frac{2}{3}}$ is $r^2 + 3p^2 = a^2$. 5
24. (a) Prove that the envelope of the parabola $\sqrt{\frac{x}{a}} + \sqrt{\frac{y}{b}} = 1$, where $ab = k^2$ is $16xy = k^2$, where a and b are variable parameters. 5
 (b) Determine the asymptotes of the cubic $x^3 - 2y^3 + xy(2x-y) + y(x-y) + 1 = 0$. 5
25. (a) Show that the curves $\frac{x^2}{a} + \frac{y^2}{b} = 1$ and $\frac{x^2}{a'} + \frac{y^2}{b'} = 1$ will cut orthogonally if $a-b = a'-b'$. 5
 (b) If ϕ be the angle between the tangent and radius vector at any point on the curve $r = f(\theta)$, then prove that $\tan \phi = r \frac{d\theta}{dr}$. 5
26. (a) Find the area of one loop of the curve $r = a \cos 2\theta$. 5
 (b) Find the area of the portion of the circle $x^2 + y^2 = 1$, which lies inside the parabola $y^2 = 1-x$. 5
27. (a) If s be the length of the curve $r = a \tanh \frac{1}{2} \theta$ between the origin and $\theta = 2\pi$ and Δ the area between the same points, show that $\Delta = a(s - a\pi)$. 5
 (b) Show that in the cycloid $x = a(\theta + \sin \theta)$, $y = a(1 - \cos \theta)$, $\rho^2 + s^2 = 16a^2$, the arc being measured from the vertex. 5
28. (a) Show that the volume of the solid produced by the revolution of the loop of the curve $y^2(a+x) = (a-x)$ about the x -axis is $2\pi a^3 (\log 2 - \frac{2}{3})$. 5

- (b) The portion between the two consecutive cusps of the cycloid $x = a(\theta + \sin \theta)$, $y = a(1 + \cos \theta)$ is revolved about the x -axis. Show that the ratio of the area of the surface so formed and the area of the cycloid is $64 : 9$. 5

29 (a) Evaluate $\lim_{n \rightarrow \infty} \left[\left(1 + \frac{1}{n}\right) \left(1 + \frac{2}{n}\right) \cdots \left(1 + \frac{n}{n}\right) \right]^{\frac{1}{n}}$. ✓ 5

(b) Prove that $\int_0^\pi \frac{x dx}{a^2 \sin^2 x + b^2 \cos^2 x} = \frac{\pi^2}{2ab}$, ($a, b > 0$). 5

----- End -----

✓

End-Semester Examination - 2024 (Autumn)
STAUGSEC1101
(Presentation Skill and Introduction to R)
Semester – I (4-years B.Sc. in Statistics)

Full Marks – 25

Time – 2 Hours

Notations and symbols have their usual meaning.

Section A. Answer ALL questions. Each question carries one mark.

1. Which is the word processing software?
 - (a) Avast
 - ☒ (b) MS Word 2007
 - (c) Google Chrome
 - (d) Mozilla Firefox
2. What type of programming language is R?
 - ☒ (a) Statistical
 - (b) General-purpose
 - (c) Scripting
 - (d) Object-oriented
3. What is MS Excel?
 - ☒ (a) Spreadsheet
 - (b) Database Management
 - (c) Presentation
 - (d) Workbook
4. What function in R can be used to generate a sequence of numbers?
 - ☒ (a) seq()
 - (b) gen()
 - (c) createSequence()
 - (d) listNumbers()
5. In R, what is a data frame?
 - (a) A special type of list
 - (b) A special type of matrix
 - ☒ (c) A low-level data structure
 - (d) A non-relational database

Section B. Answer ALL questions. Each question carries ten marks.

6. Using Excel generate 50 random numbers for $X = (10, 50)$, and $Y = (20, 70)$, evaluate the following; 10

- (a) $X + 3Y$
- (b) $4X + 2Y + XY$
- (c) $\log(x + y) + 2e^x$
- (d) $\frac{X}{5} + Y * 35\%$

7. Marks in Statistics of 50 students are given compute the following using R;

32	47	41	51	41	30	39	18	48	53
54	32	31	46	15	37	32	56	42	48
38	26	50	40	38	42	35	22	62	51
44	21	45	31	37	41	44	18	37	47
68	41	30	52	52	60	42	38	38	34

- (a) Construct frequency table.
- ~~(b)~~ Find the average scores of the students without using the mean function.
- ~~(c)~~ Find the median scores of the students without using the median function. 41
- (d) Draw the histogram of the given marks.

----- End -----

Aliah University

Odd Semester Examination 2025
Course Title: Arabic and Islamic Studies
Course Code: UCCUGMDC1101

Full Marks: 60

Time: 3:00Hrs.

Arabic (20)

1. Attempt any five questions, each of them carries equal marks.

2×5=10

i. Identify the following words whether they are Noun (اسم) or Verb (فعل)

أَلْهَنْدُ، فَسَوَفَ يُحَاسِبُ، بِأَلْيَدٍ، قَدْ قَامَتْ

ii. Change the Gender of the following words. صَادِقٌ، قَابِئَةٌ، صَابِرٌ، خَضِرَاءُ

iii. Merge the following letters to form words م+س+ت+س+ل+م+و+ن، ي+س+ت+ط+ي+ع+و+ن

v. Write down any two examples of Harf (الحرف).

vi. Change the Nominal sentence into verbal sentence and Verbal sentence into Nominal Sentence. كَتَبَ الْأُسْتَاذُ عَلَى السَّبُورَةِ أَلَوْلَدُ ذَهَبَ إِلَى الْمَدْرَسَةِ

Q. 2. Attempt any two Questions of the following.

10×2=20

- Explain the Parts of Speech in Arabic, write all of them with examples.
- Write the name of the Days in Arabic.
- What do you know about Importance of Arabic Language? Write in details.

Islamic Studies (20)

Answer any three Questions of the following:

10×3=30

- How many Pillars are there in "Iman". Write all of them in short.
- Define "Tawheed" and its types with examples.
- What do you know about Zakat? Write in details.
- Explain the concept of Risalat, particularly highlighting the distinctions between Nabuwat and Risalat?

ALIAH UNIVERSITY

Department of Urdu

Odd (Autumn) Semester Examination-2024
For New Town Campus Courses (First Sem)

Course Code: UCCUGAUC1103

Course Title: Urdu Zaban-o-Adab

اردو زبان و ادب

F.M: 80

Time: 3Hrs

5x4=20

(1) مندرجہ ذیل سوالات میں سے چار کے جواب اردو میں دیجیے۔

(1) Answer any four of the Following Questions:

(i) Write the name of 5 cities of India.

(i) ہندوستان کے پانچ شہروں کے نام لکھیے۔

(ii) Write 5 four letters word.

(ii) چار حروف کو ملا کر پانچ الفاظ بنائیے۔

(iii) Write these words in Urdu.

(iii) رومن میں لکھے ان الفاظ کو اردو میں لکھیے۔

Aliah, Motor, Kolkata, School, Science

(iv) ان حروف کو ملا کر الفاظ بنائیے۔

(iv) Form word by joining these letters.

(الف) بھ + ا + ر + ت

(ب) ش + ب + ن + م

(ج) ا + م + ت + ح + ا + ن

(د) ر + و + ز + ہ

(ه) ب + ا + ل + ک + ل

(v) "د" سے شروع ہونے والے پانچ الفاظ لکھیے۔

(v) Write five words starting with letter "Daal".

(vi) پانچ پھولوں کے نام لکھیے۔

(vi) Write the name of five flowers.

(vii) غالب کا پورا نام بتائیے اور ان کی غزل کا ایک شعر لکھیے۔

(vii) Write the full name of "Ghalib" and one verse of his ghazal.

10x3=30

(2) مندرجہ ذیل سوالات میں سے تین کے جواب لکھیے۔

(2) Answer any three of the following Questions:

(i) "عالیہ یونیورسٹی" پر پانچ جملے لکھیے۔

(i) Write five sentences on "Aliah University".

(ii) "ا" یا "آ" سے شروع ہونے والے دس الفاظ لکھیے۔

(ii) Write ten words starting with " Alif " or " Alif Mad Aa ".

(iii) "ہولی" کس کی نظم ہے؟ ان کا پورا نام بتائیے اور ان کے بارے میں پانچ جملے لکھیے۔

(iii) Who is the poet of the poem "Holi". Write five sentence on him.

(iv) اردو کی ان گنتیوں کو لفظوں میں لکھیے۔

(iv) Write these numbers in Urdu words.

۵۰ ، ۳۳ ، ۲۱ ، ۱۵ ، ۱۲

15x2=30

(3) مندرجہ ذیل میں سے دو کے جواب تفصیل سے دیجیے۔

(3) Write any two of the following Questions:

(i) اردو زبان کا تعارف دس جملوں میں پیش کیجیے۔
